Equipped with an efficient manual dust suction system and a filter, the TASKI balimat pro removes the fine dust whirled up by the sweeping roller brush with the air flow.

Flexibility

The balimat 1600 is designed for indoor and outdoor use and allows cleaning on hard floors as well as carpet. There are two versions available for your choice. The balimat 1600 basic with one side broom and no manual suction and the balimat 1600 pro with two side brooms and manual suction for more efficiency. Due to the fan and filter the balimat 1600 pro works with significantly less dust than most manual sweepers.
